PIPER / FIELD REVIEW

Inspection brief

Geneva St, 02128

East Boston · boston

Place d81ec67db3a8fa1e · Prepared Oct 24, 2026, 5:19 PM EDT

Public block label; confirm the precise location before a visit.

Why review this place

Review suggested: the latest closure was within 60 days, and a report has followed an earlier closure.

Individual records	Report days	Closure days	Return days
31	**26**	**26**	**20**

Report history: Aug 5, 2024–Oct 13, 2026. Latest recorded closure: Oct 21, 2026.

Report days and closure days count distinct dates, not individual records. Several records can share a date. Return days count report dates with a report more than 1 day and no more than 60 days after an earlier closure. History includes rodent reports since January 2024.

Missed trash pickup	1	Source attribution unavailable; freshness unknown.

Vacant parcels within 40 m: **1**. This is a source snapshot, without the 12-month report filter.

Source attribution unavailable; freshness unknown.

Proximity provides context and does not establish a cause. Coverage and update schedules differ by source and city.

Questions for the visit

1. Is there current rodent activity? Record what you observe, where, and when.
2. What response was recorded previously, and can its current condition be checked on site?
3. Are food waste, storage, entry points, or shelter present? Verify nearby records against current conditions.
4. What follow-up is needed, who will own it, and when should the location be checked again?

Field notes / observer / date / follow-up

Report history and recorded responses

31 individual records, newest opened first. Closure notes are reproduced in full as available in Piper.

Sources and freshness

Retrieval and import times describe Piper’s copy, not current field conditions. A live or daily label describes the intended update schedule. Static sources retain their original snapshot.

Some source attribution could not be loaded. Nearby counts have unknown provenance and freshness in this export.
